2. Description of the Main Features of the Credit

Type of credit	Secured consumer credit, where the gold held in the borrower's Voima Account (within the service provided by Voima Gold Oy) serves as collateral.
Total amount of credit <i>This refers to the credit limit or the total amount made available under the credit agreement.</i>	The total amount of credit depends on the amount applied for, the amount of gold in the borrower's Voima Account, and the assessment conducted by the Lender.
Conditions governing the drawdown <i>This means how and when the money will be made available.</i>	The credit becomes available after the Lender has processed the credit application, approved the loan, and transferred the credit amount to the borrower's Voima Account.
Duration of the credit agreement	The duration of the credit agreement is 90 days (3 months). The period begins once the credit amount has been received into the Voima Account.
Repayments	The credit has no predetermined repayment installments or schedule. The borrower may decide the repayment time themselves, bearing in mind that the Company has the right to terminate the credit agreement on its due date. If the borrower decides to repay the credit or part of it, the borrower must notify the Lender of the repayment in a permanent manner at the address: contact@voimagold.com
Total amount payable	The payable interest and other costs are specified in the credit application and credit agreement.
Required collateral <i>This describes the collateral you provide in connection with the credit agreement.</i>	The Lender retains the right of control over the gold provided as collateral until the borrower has fully repaid the credit amount, interest, and other service fees.

3. Costs of the Credit

Loan interest	The loan interest depends on what is agreed in the credit application and the credit agreement. The Lender determines the interest rate.
Annual Percentage Rate (APR) <i>The total costs expressed as an annual percentage rate for the total amount of the loan. The APR makes it easier to compare different offers..</i>	The APR is equal to the Loan Interest, since the Lender, Voima Gold Financing Oy, does not charge any additional fees.
Is it generally required, or required under the marketed terms, to obtain in order to receive the credit: - an insurance policy as collateral for the loan - or another agreement concerning an additional service <i>If the costs of these services are not known to the Lender, they are not included in the APR.</i>	A condition for receiving the credit is that the borrower has opened a Voima Account with Voima Gold Oy's service and has agreed to the Terms of Service. In addition, the borrower must have a sufficient amount of gold holdings in the Voima Account's gold account to cover the credit amount granted. If the borrower wishes, they may agree on other additional services with Voima Gold Oy. The costs of any such additional services are also not included in the APR.

Other Costs

All other costs arising from the credit agreement	Gold held in Voima Gold Oy's Voima Account service, which maintains the collateral, is subject to an annual account fee of 0.99% p.a. The gold pledged as collateral for the loan is no exception to this fee.
Conditions under which the above-mentioned costs related to the credit agreement may be changed	The Company must notify at least 30 days before the renewal of the agreement of any possible changes that would increase the borrower's obligations, including changes to the interest rate and loan maturity.
Costs arising from payment delays <i>Failure to make payments can have serious consequences (for example, forced sale), and obtaining credit may become more difficult.</i>	The Lender has the right to sell gold and use the proceeds from its sale to cover its receivables, as well as the right to charge late payment interest and collection costs, if such costs are incurred.
